Introduction

This electronic version of the CTFA International Buyers' Guide is updated quarterly. The printed version of the Buyers' Guide is published annually by the Association as a service to the personal care products industry.

The *Buyers' Guide* is an indispensable resource featuring the most comprehensive listing of cosmetic raw materials and their suppliers. It contains over 12,000 ingredients listed by INCI name and cross-referenced to over 55,000 technical and trade names. Contact information is provided for nearly 3000 ingredient suppliers from 84 countries. In addition, the *Buyers' Guide* lists hundreds of packaging suppliers and service providers, testing and consulting facilities, and private label manufacturers.

Every purchasing agent, formulator, cosmetic chemist and supplier will find this simple-to-use reference a must for quickly locating international suppliers to the cosmetic and personal care products industry.

Distribution of the printed 2004 edition of the *Buyers' Guide* reaches manufacturers in the U.S., Europe, appan and many other countries. You can order a printed version of the *CTFA International Buyers' Guide* ough the Publications Store, on the left, or by contacting: CTFA Publications Orders at 301-953-2614, fax >01-206-9789, E-mail publications@ctfa.org.

CTFA members may receive an unlimited number of free copies of the printed version where shipping is paid in advance (\$10 per copy if shipped in U.S.; if ordering more than three copies, contact customer service at 301-953-2614 for bulk shipping rates). The cost for CTFA non-members is \$235 per copy. For all international orders, contact customer service for air shipping costs.

INCI Labeling Names

INCI (International Nomenclature Cosmetic Ingredient) names are used in the United States, the European Union, Japan, and many other countries, for listing ingredients on cosmetic product labels. With few exceptions, the INCI labeling names in all countries are the same. The exceptions include some botanicals, colorants, and "trivial names." "Trivial name" is the designation given to a different specific name that is used in one particular region because of consumer (or government) sensitivity to an existing INCI name.

Additionally, in some countries (currently Brazil, Mexico, and Japan), while the INCI name is the basis of the ingredient labeling names, they are translated or transliterated. To determine the appropriate labeling name for a cosmetic ingredient in each market, you should consult the most current version of CTFA's *International Cosmetic Ingredient Dictionary and Handbook*, or the official translation for those countries requiring INCI names in their national language.

All INCI names are assigned by the International Nomenclature Committee, which has industry and government representatives from the major international markets. To apply for an INCI name, please use form TN, following Form TN Instructions. There is no charge for this service.

Contact A & E Connock (Perfumery & Cosmetics) Ltd. for a Technical Brochure on Cholesterol.

A & E Connock (Perfumery & Cosmetics) Ltd is a supplier of specialty ingredients to the cosmetic, toiletry, and perfumery industries worldwide. The company was founded in 1973 by Alan and Elizabeth Connock and has since established itself as a leading name in the global marketplace. Much of this is due to a vast product range, speedy service and keen pricing but there is another vital element: a personal touch. Those that contact A & E Connock will encounter a friendly, welcoming company where enquiries are dealt with efficiently and politely and telephones are answered promptly by people, not machines.

A & E Connock is a name that should be on all formulators' contact lists. The company's product portfolio includes unusual and exotic materials drawn from all around the world in addition to the more familiar established

Since 1975, Sederma has been an international leader in the development of innovative active ingredients for skin and hair care. With a team of dynamic scientists, ultra modern laboratories and advanced technologies, including in-vitro, ex-vivo and clinical test methods, Sederma is able to prove the enhanced biological and cosmetic benefits of their products.

As a pioneer in the field of biotechnology, Sederma was the first company to use microbial cells to produce active ingredients. Sederma also synthesizes biopeptides and ceramides identical to those of the skin. To offer more active botanicals, Sederma markets pure plant molecules produced by its sister company Crodarom. Sederma also offers PHYTOTAL total plant extracts, a range of multi-component extracts that combine plants with synergistic activities-synergies that have been documented by a series of in-vivo studies evaluating their moisturization, skin-firming, anti-wrinkling, anti-inflammatory and anti-free radical effects.

The Sederma product line reflects a wide range of innovative concepts, supporting all your marketing claims. Sederma is a member of Croda International PIc, one of the leading suppliers to the Cosmetic Industry. With their shared commitment to innovation, Sederma and Croda are companies that truly complement each other. To learn more about Sederma, please contact your Croda Representative or Sederma directly.

Lip Therapy Stick with MAXI LIP MU-70

Ingredients:	% Wt.
Phase A	
Castor Oil	51.45
Crodamol PTIS (Croda) (pentaerythrityl tetraisostearate)	16.50
Cromollient DP3A (Croda) (di-PPG-3 myristyl ether adipate)	11.00
Candellia	7.00
Super sterol ester (Croda) (C10-30 cholesterol/kanosterol esters)	5.00
Microcrystalline wax	3.50
Ozokerite MOD	2.50
Carnauba	1.75
Methyl paraben	0.20
Propyl paraben	0.10
Phase B	
Maxi Lip (Croda) (Ethylhexyl palmitate (and) tribehenin (and) sorbitan isostearate) (and) palmitoyl oligopeptide)	1.00

Procedure:

Combine ingredients of phase A and heat to 85-90°C, mixing until clear. Cool to 70-75°C and stir in phase B, mixing until homogenous. Pour into molds at 68-70°C.

Comments:

This stick formula uses Maxi Lip to increase lip moisture and add volume to the lips. Specifically designed for lip care, Maxi Lip hydrates the lips and restores glycosaminoglycans and collagen, making it ideal as lip therapy to improve the contour of the lips and give better definition to the lipline. Cromollient DP3A is used for its excellent wax solvency. Super Sterol Ester is considered the benchmark emollient for lipsticks.

BHA Cream with Crodafos CES

Ingredients:	% Wt.
Phase A	
Crodafos CES (Croda) (cetearyl alcohol (and) dicetyl phosphate (and) ceteth-10 phosphate)	4.0
Crodacol C-70 (Croda) (cetyl alcohol)	3.0
Volpo S-2 (Croda) (steareth-2)	0.5
Volpo S-10 (Croda) (steareth-10)	1.0
Super Sterol Ester (Croda) (C10-30 cholesterol/lanosterol ester)	5.0
Crodamol GTCC (Croda) (caprylic/capric triglyceride)	10.0
Propylparaben	0.1
Phase B	
Deionized water	58.4
Disodium EDTA	0.2
Trisodium citrate	2.0
Salicylic acid	2.0
Glycerin	5.0
Methylparaben	0.2
Phase C	
Ethylhexyl methoxycinnamate	5.0
Matrixyl (Sederma) (water (and) glycerin (and)	
butylene glycol (and) carbomer (and) polysorbate 20 (and) palmitoyl pentapeptide-3)	3.0
Citric acid	0.1
Glydant (Lonzagroup)	0.5

Procedure:

Combine phase A ingredients and heat to 75°C. Combine phase B ingredients and heat to 85°C, mixing until clear and uniform. Cool to 75°C and add phase A, mixing vigorously. Maintain 75°C for 20 minutes and cool to 40°C. Add phase C ingredients individually with mixing. Adjust pH to 4.0 with citric acid or trisodium citrate.

pH=4+0.5; viscosity=56,000cps (RVT spindle #TC@10rpm).

• Contact Croda, Inc. for a Technical Brochure on Cholesterol NF.

Since 1975, Sederma has been an international leader in the development of innovative active ingredients for skin and hair care. With a team of dynamic scientists, ultra modern laboratories and advanced technologies, including in-vitro, ex-vivo and clinical test methods, Sederma is able to prove the enhanced biological and cosmetic benefits of their products.

As a pioneer in the field of biotechnology, Sederma was the first company to use microbial cells to produce active ingredients. Sederma also synthesizes biopeptides and ceramides identical to those of the skin. To offer more active botanicals, Sederma markets pure plant molecules produced by its sister company Crodarom. Sederma also offers PHYTOTAL total plant extracts, a range of multi-component extracts that combine plants with synergistic activities-synergies that have been documented by a series of in-vivo studies evaluating their moisturization, skin-firming, anti-wrinkling, anti-inflammatory and anti-free radical effects.

The Sederma product line reflects a wide range of innovative concepts, supporting all your marketing claims. Sederma is a member of Croda International PIc, one of the leading suppliers to the Cosmetic Industry. With their shared commitment to innovation, Sederma and Croda are companies that truly complement each other.

Croda Inc. is a leading supplier of cosmetic raw materials, specializing in the development and manufacture of innovative specialty ingredients and in the introduction of new technology and product concepts for the personal care industry. Croda is the industry leader in protein technology, as seen in the novel chemistry of its proteins, and offers a complete line of proteins for hair care and other applications, including a wide range of proteins derived from vegetable or other natural sources. Croda is also recognized for developing leading-edge amphoteric and cationic surfactants, as well as high purity lanolin products. Croda offers state-of-the-art technology in both disciplines and is considered a major supplier of these specialty ingredients.

Some of our most well-known products include Polawax, Crovols, Hydrotriticums, Incroquats, Crodamols, Crodafoses, Volpos, Incronams, Crosilks, Crodacels, Polychols, Crothix and Crosultaines. With its acquisition of Sederma, Croda now offers an entire product line of active ingredients. Considered the premier of bioactive products in the Industry, Sederma ingredients have all undergone intensive efficacy testing to document their biological effects on the skin and hair.

As part of Croda International PIc, Croda Inc. provides global sourcing for the personal care industry. With manufacturing sites located throughout the world and product development centers in Europe, Japan, and the United States, Croda is committed to maintaining its global leadership position within the personal care industry. The Croda name represents the best in innovation and quality and the ingredients Croda offers set the standard for the next generation of advanced personal care products.

Moisturizing Night Cream

Ingredients:	%Wt.
Water	80.00
Glycerin	5.00
Aloe vera gel 10:1 (Tri-K) (propylene glycol and aloe barbadensis extract)	1.00
Biobase AA (New Paradigm/Tri-K) (glyceryl stearate, stearic acid, cetearyl alcohol and palmitoyl hydrolyzed wheat protein)	5.00
Sweet almond oil (Tri-K)	2.00
→ Sphingolipid E (Kao)	1.00
Silsoft 034 (OSi-Witco/Tri-K) (octyl methicone)	2.00
Glossamer L-6600 (Tri-K) (polytriglyceryl erucate/eliostearate)	1.00
Spectron-LS09 2.00 (liquid shea butter)	2.00
Germaben II (Sutton/ISP) (diazolidinyl urea and propylene glycol and methyl and propyl paraben)	1.00

Procedure:

Combine water phase ingredients and heat to 70-75°C. Combine oil phase ingredients and heat up to 70-75°C. Add oil phase to water phase while homogenizing. Continue homogenization for oneminute (time of homogenization depends on equipment and batch size). Continue mixing with propellor agitator and cool the batch to 40°C. Add Germaben II until batch is uniform.

Universal Preserv-A-Chem, Inc. 33 Truman Drive South Edison, NJ 08817-2426 Phone: (732) 777-7338 Fax: (732) 777-7885

Contact Universal Preserv-A-Chem, Inc. for a Technical Brochure on Cholesterol.

UNIVERSAL PRESERV-A-CHEM INC. (UPI), a family owned business founded by Herbert Ravitz, is a leading distributor of natural ingredients and chemicals to manufacturers of food, cosmetics, pharmaceuticals, flavors, fragrances and industrial and institutional products.

Many of the company's products are produced by the Henkel/Emery/Cospha Group. UNIVERSAL PRESERV-A-CHEM has a wide range of products which include emollients, emulsifiers, conditioners, sunscreens, preservatives, glycerides, glycols, alcohols, sorbitol and basic additives for flavors and fragrances. UPI has established a market niche by sourcing only high-quality products and delivering them to the market place. Customers receive excellent value because of the company's commitment to responsive service. Since customers no longer carry large inventories of chemicals and ingredients, UPI maintains stocks for just-in-time deliveries. Also with the market trend toward increased usage of natural ingredients in formulations, UPI does contend with a much larger product mix of both synthetic and natural materials.

UPI recently moved its headquarters and core warehousing operations to Edison, NJ. The purchase of these new facilities triples the company's previous space to 60,000 sq. ft.

This state-of-the-art warenouse has been designed for maximum efficiency. 30,000 sq. ft of racking, 200 ft. long aisles, four high racking, give UPI enormous inventory capacity while enhancing visibility and accessibility. The company has made a considerable investment in the latest equipment and an upgraded computer software system markedly improving response time to customers' orders. Six loading bays provide flexibility to handle multiple shipments and deliveries simultaneously.

UPI will continue to maintain an 8,700 sq. ft. satellite warehouse to provide full services at its original Brooklyn location for Long Island and New York City area customers.
